

SYSTEM AND METHOD FOR PRODUCING MEDICAL IMAGE DATA ONTO PORTABLE DIGITAL RECORDING MEDIA

Abstract of the Disclosure

5 This application discloses a system for recording medical image data for
production on a portable digital recording medium such as CDs and DVDs. This system
includes a receiving module, a processing module and an output module, with viewing
program for viewing medical image data stored on the portable digital recording
medium. It also discloses a method of storing medical image data on a portable digital
10 recording medium, including the steps of receiving the medical image data, processing
the data and storing the data on the portable digital recording medium, with a viewing
program for viewing medical image data stored on the portable digital recording
medium. It further discloses a method of selecting medical image data for recording on
a portable digital recording medium, including the steps of connecting a browsing
15 terminal to a computer database that stores the medical image data, selecting a first set
of the medical image data from the computer database, and recording the selected first
set of medical image data on the portable digital medium, with a viewing program for
viewing the medical image data stored on the portable digital recording medium. It also
discloses the method and system of retrieving medical image data that are related to the
20 received/selected original medical image data, and recording the original and related
medical image data on a portable digital recording medium.
